

## ENVIRONMENTAL POLICY

**Floatel International is committed to minimize the environmental impact emanating from our operations.**

***To achieve our commitments we shall:***

- *Strive to reduce our consumptions, emissions, discharges and waste, as well as reuse or recycle material based on a zero discharge mindset.*
- *Use materials, chemicals, methods and equipment with as low environmental impact as reasonably practicable and whenever appropriate use substitutes with lower environmental impact.*
- *Ensure that adequate emergency response procedures are implemented in case of an uncontrolled discharge.*
- *Always work to fulfill our environmental objectives and duties.*
- *Always work to improve our environmental management system and performance.*
- *Always work in accordance with the latest regulatory requirements, as well as relevant environmental codes, standards and local requirements.*
- *Ensure that the Environmental Policy is communicated and understood by all employees and other stakeholders.*
- *Ensure that our management system is adequate to manage, monitor, review, report and communicate our environmental objectives, targets and performance.*
- *Ensure that environmental protection and pollution prevention are integral parts of our management system and operational activities.*
- *Ensure that sufficient resources are available to achieve and maintain our environmental objectives.*
